YOU'RE NOT USING the BEST

Western Style *"Strip Easier"* All Steel Forms

ENGINEERED FOR CONCRETE BASEMENT CONTRACTORS

When Time, Money, Accuracy and Wall Smoothness Count . . . Count on "Strip Easier" ALL STEEL FORMS . . . They're the BEST!

SMOOTH FACE SHEET

Only 14-gauge high-tensile steel is used, with welds at 3" O.C. to prevent face buckle, dents and sags. Strip Easier panels always give slick, smooth walls and they strip clean even in cold weather.

3' x 4' SHORT PANEL

This handy size panel allows you to pour a 3' or 4' high garage wall. Another big extra—permits pouring basement and garage wall at the same time. The short panel pins up with regular size panel at top or bottom. They stack up to any wall height in even number of feet: 6' - 7' - 8' - 9' - 10', etc.

FAST - EASY ACCURATE FOOL PROOF SET UP

First, panels are positioned, then pin is placed through form and tie, then through panel opening and locked into place with wedge.

WEDGE IS EASILY STRIPPED . . .

by blow from hammer on the pin nose. Pin will not bend, break or squeeze together at wedge slot. Notice the bushing around the opening. It is hardened steel that prevents wedge from binding or sticking. This feature alone will save you plenty of stripping time!

Actual Hi-speed photo.

NO TOOLS REQUIRED!

Simply SNAP waler bracket on and press waler in place.

RUGGED FRAME

Coped and interlocked with sturdy steel channels, forms an extra strong, positive 3-way lock. Frame will withstand pouring rates up to 15' per hour.

600 POURS A MINIMUM

Many basement contractors still using after 2,000 pours.

(A product of Metal Specialties, Inc.)

3' WIDE

Strip Easier one-man panels simply slide into place. Panels weigh only 5.9 lbs. per sq. ft. The average basement size 24 x 40 can be set up in 10 manhours. Strip down and ready to move the same size basement in only 2 manhours. You get the same results with your present crew right from the first job, no experience necessary.

Strip Easier All Steel Forms used on Capeheart Housing were approved by the K. C. Corps of Engineers.

SNAP ON or SNAP OFF WALER BRACKET

with one hand in less than 5 seconds! Precision made of high tensile aluminum alloy. Special designed ridge locks lumber into place. Adjustable from 2" x 4" to 2" x 8" for scaffolding.

STRIP EASIER SNAP TIES

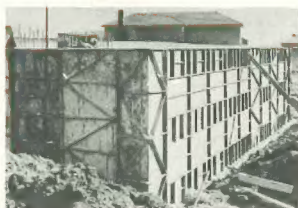

Flat, high tensile steel with holes at each end. Tie pictured is used for either 6" or 8" wall. Available in 5,000 lb. and 7,000 lb. test.

ERECTS and STRIPS 2 TIMES FASTER THAN ANY OTHER SYSTEM
